Whole Number 409

## FIVE REASONS WHY WHEAT PRODUCERS SHOULD SUPPORT THE WHEAT POOL

1. Because yourself-protection as a producer is incomplete and ineffective if private organizations can still exploit you by manipulating prices against you.
2. Because co-operation helps to uphold the standard of living by suppressing the element of profiteering in the grain produced by your labor.
3. Because co-operation eliminates unnecessary middlemen and dividend hunting shareholders, who take a heavy toll of the wealth produced by the farm workers.
4. Because the co-operative principle of "each for all, all for each" is the workers' ideal which alone can bring economic and social justice, peace and prosperity, to all throught the world.
5. Because the farm workers ought to concentrate their resources in co operation instead of supporting capitalistic organizations hostile to co operative movements.

### LOCAL NEWS.

Mr Dan McKinlay, Namayo, paid Stony a visit oh Saturday.

Mr Gus Mintz was down from Mackay over the weekend.

Mr and Mrs M Comisarow and family made a motor trip to the City on Sunday.

A detachment of the Salvation Army, with their band, livened things up a bit on Main street, Saturday evening.

Corp. Moses started, last week, enforcing the provisions of the Highway Traffic Act. Mr Clarke, a traveller from Edmonton, paid a fine for operating his motor vehicle so as to cause it to cross over from one side of the street to the other side thereof between intersecting streets.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Meeklenburg, eye specialist, will be in Stony Plain on Friday, June 1st.

### Brush-cutters by Express.

The local demand for immigrants for immediate use as brush cutters, etc., having become so great, just at present, it was found that the old system which obtained was obsolete.

To give farmers quicker action when wanting men, and to aid the newly-arrived immigrants in more quickly obtaining employment, Mr Paul Meredith last week inaugurated the system of inquiring among the farmers who wished help, and going to the employment office in Edmonton, and bringing back the men required in his motor truck.

This system has been found completely satisfactory.

Put in your order, and get your man out by express.

### Edmonton Beach Notes.

Edmonton Beach put on the swellest dance of the season Saturday night last, June 21, when Bob and his Troubadours from the City, six-piece orchestra, the best that money can secure, 2 saxaphones, banjo, piano, violin, traps and drums, played some excellent music for the large crowd of dancers. A return engagement has been asked for.

Lyle Barrie has installed a new diving platform, which will no doubt be well patronised.

Mr Barrie is receiving numerous inquiries regarding the location and price of his Beach lots which remain unsold.

## Talk Peace To Have Peace

It is now fairly well recognized by students of international relations that one of the causes of war is to be found in the constant predictions of war, in references to "the next war," and surmises as to the varying forms which hostilities will take when nations again take up arms against each other. Those who constantly predict war are, says a college president, "not simply reporters of probable events, they are actual causes of war, generally among the chief causes." That is, talk war and you have war.

Recognizing the correctness of this view, it is equally true that if the statesmen and "leading men in all countries cultivate the habit of talking peace, instead of war, the world will have peace. "The oftener would peace be discussed among serious minded men and women," says a United States paper, "the better the prospect that war can be at last conquered," and it adds that the more intelligent leaders of democracy the world over can be brought together to consider steps for peace. As they gather from time to time at Geneva, the brighter becomes the prospect that ultimately—perhaps sooner than most of us now believe—war will be abolished.

War after all is largely a state of mind. Let the people of any community or country begin to take a pessimistic view of things and constantly harp upon business depression and hard times, and it is inevitable that depression and hard times will come. Equally true is it that when people talk property and adopt an optimistic tone, a revival in business and industrial activity follows. If, instead of thinking of "the next war," men are talking war, people think and talk peace, then peace rather than war will prevail.

It has been reported that the Supreme Court of the United States has settled one hundred disputes between States, and in Canada our Supreme Court and the Judicial Committee of the Privy Council, have settled numerous disputes between Provinces and between Provinces and Dominion. Why should not disputes between nations be settled in a like sensible way? There is quite as much justification for two States or two Provinces to declare war and fight at each other's throats as there is for two nations to take such insane action.

War is a stupid business. It settles no issues. It comes about when a little group of men get into a quarrel with another little group. The law does not allow individuals to murder each other because they have a quarrel, and international law should, in like manner, outlaw war as a means of settling disputes between nations. War between nations is evidence that the leaders in these countries have not sufficient intelligence or sufficient patience to find a way out, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this longer is the wiser and gets its own way. There is no reason employed in the settlement.

Sir Esme Howard, British Ambassador at Washington, in a recent address said: "If it can be proved to a man that if his country goes to war for any issue short of its absolute liberty of action at home, and in defence of that liberty, he will in future stand a very good chance of being bombed in his home; if we can show him that even though his country may be victorious, he will certainly have his taxes increased by 200, 300, 400 or 500 per cent.; if we can make it clear to him that for the sake of some issue to which he is probably an entire stranger he risks having to give up that new Ford next month, or, even worse, that he may very probably be thrown out of work, as has been the fate of millions in Europe after the last war; then perhaps he may find war less pleasingly dramatic and may begin himself to see that as a means of settling disputes between nations, it is better abandoned. So far as statecraft is concerned, the fear of war is the beginning of wisdom."

Some people may be inclined to doubt the value of Peace Talks, Disarmament Conferences, and treaties between nations outlawing war, but the fact is these are all factors in educating people and helping to create and develop a peace consciousness in all countries. And, let it be repeated and emphasized, the creation of such a consciousness is the strongest of all guarantees for the maintenance of peace.

### Medical Aid Caravan

A medical aid caravan will circulate through Northern Alberta this year. It has been sent out by the provincial department of health and is in charge of Dr. R. T. Washburn, superintendent of the University of Alberta hospital.

The beam cast by the latest monster beacon is estimated at 500,000, 000 candlepower.

## When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been overstimulated, and food sour. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

### Increase In Acreage

Increase in acreage of every grain in the Lethbridge Railway division, with an increase of over half in rye, is shown by the first crop report of the Canadian Pacific Railway.

A British scientist predicts that, in time to come, men will be born toothless. We thought, in our ignorant way, that they usually were born that way.

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

### Parachute Lands Plane Safely

Invention Of California Man Proves Feasible In Test

A small biplane has been landed safely from 2,000 feet by means of a huge parachute, without injury to its pilot or damage to the plane. The experiment, performed privately at Tracy, Cal., was designed to prove the possibility of using a parachute for disabled planes to insure safety of passengers. A Jenny biplane, piloted by E. J. McKeown, was used in the test.

The plane dropped about 2,000 feet with its motor idle, when the huge parachute, more than 100 feet in diameter, opened out. McKeown stayed with the ship as its speed rapidly slackened. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged except for a minor bend in the tail skid.

The parachute is the invention of Charles Roderick, San Francisco, who with numerous other airmen, expressed complete satisfaction over the result of the experiment.

### Tractors On The Farm

Western Farmers Investing More Heavily In Motors For Heavy Duty

There are in Alberta today 71,192 farmers who have 83,524 horses in use, and 10,225 tractors. In Saskatchewan records show 110,702 farmers with 1,199,566 horses, and 24,367 tractors. Manitoba has 51,209 farmers with 556,480 horses, and 10,833 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

### FIGHTING FOR

## BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so sudden—sometimes within a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood. Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they proclaim them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug, and are so harmless to the future welfare of the baby. Mothers, if you value the life of your little one, get a box of Baby's Own Tablets when he is ill, or, better still, give him an occasional dose of the Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, post paid, at 25 cents a box by application. The Dr. Williams' Medicine Co., Brockville, Ont.

### Tribute To British Flag

Union Jack Made Union Flag Possible Says South African Councillor

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some commotion about it—South Africa. A press despatch from there says that native affection for the flag was eloquently demonstrated at a General Council of the Transkeian Territories which might be described as a native Parliament, when the Council unanimously passed a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magistrate's offices in the native territories. A Councillor asked the members not to discard their old friend the Union Jack, which had freed them from slavery and which was the only flag they knew. He did not object to the Union Flag, but pointed out that were it not for the Union Jack there would be no Union flag. We might also venture to say that were it not for the Union Jack there would be no Canada as there is today.

A reliable antiseptic—Minard's.

### Progress Has Been Made

Sending Messages By Beam System Is Marvel Of Speed

What beam wireless has done for long-distance communication was explained by J. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal branch of the Engineering Institute of Canada, recently. Using slides, the speaker produced a graphic picture showing a telegraph operator at Drummondville, Quebec, using an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the minute, to be received almost instantly by an operator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless, the progress having been so rapid that equipment of stations used 15 years ago is of no use today. The beam system itself, he said, was the result of experiments by which all the energy available at the sending station was successfully sent in one direction thus establishing a beam of energy.

Some men are sentenced to hard labor for life and some do it of their own accord in order to make ends meet.

### Seed Growing In B.C.

Industry On Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island of steadily increasing importance. Vancouver Island sweet pea seed sells on the English market from three to four shillings per pound more than the California seed. The largest sweet pea seed farm is at Duncan, which produces yearly about two tons. From 15 to 20 women are employed each year to pick, clean and pack the seed whose excellence and high quality is becoming world-famous.

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

A man could learn a great many things if he didn't think that he already knew them.

For Hay Fever—use Minard's.

The average man prides himself on the possession his neighbors can't afford.

## HERCULES

PERMANENT BUILDING PAPER

### EASY TO USE

Hercules Permanent Building Paper is tough. It will not tear or crack with rough handling. Builders save time and avoid inconvenience with it.

### EASY TO SPECIFY

Hercules comes in three grades—x, xx, xxx—for various purposes. Specify "Hercules" and the grade required.

### EASY TO SELL

When a home is Hercules protected, selling is easy. There is always a ready market for a dry and warm home. Hercules is tested and proven wind proof and damp proof.

Examine Hercules. We will gladly furnish samples. May we?

Appleford Paper Products  
HAMILTON, CANADA

## Railways and Aircraft Companies In United States Join Hands To Supply Transcontinental Service

This aviation generation will probably not be able to assimilate space, but it is certainly destroying distance. Air lines to the other planets and the nearer stars are not yet in sight, but the stretches of the earth are being turned into aerial taxi stands. Also, as is man's habit when he is determined to cover great distances in brief time, the earlier hardships of swift travel are being eliminated. The latest combination of speed with comfort is announced in the formation of the "plane-train service to Los Angeles from New York and return."

It has not yet been begun, but the personnel of its sponsorship assures its early establishment. Within a few weeks it will be possible to reach Los Angeles in forty-eight hours from New York, with two nights of sleep aboard a Pullman. Two railroads—the Pennsylvania and the Atchafalaya, Topeka and Santa Fe—the two leading aircraft companies—Curtis and Wright—and many strong banking houses have combined in the project. Capital stock up to \$5,000,000 has been subscribed with no public offering, and the company is about to publish its rates, its time schedules and the names of its pilots. The planes, which will carry transcontinental passengers during the daylight hours, have a capacity of fourteen persons each; meals will be served in the air as on the Pullmans; and the tourists will be in their hotels at Los Angeles or New York before the light fades on the second day. It is part of the new miracle wrought by the union of science and finance, with "planes and railroads acting as auxiliaries instead of rivals. Passage by air has become a conventional daily affair in Europe, where generally the scope of men's business interests requires a journey only from one country to another and without the handicap of such distances as we have here. To meet the spread of this broad land the new combination has been devised by men equally responsible for management and for transportation. It may be only the beginning of an entirely new system of general travel in this country.

Trips to the moon will probably have to be left to succeeding generations, which will have left only interstellar spaces as their objective. But news like this about the train-plane almost leads ordinary citizens to expect a time when their vehicles, Pullman cars by night will take wings by day and, rising from the tracks, carry them through the air until night comes again.—New York Times.

**To Study Distance Of Stars**  
W. F. Harper, assistant director of the Dominion Observatory at Victoria, B.C., told the members of the Royal Society of Canada, that at the Victoria observatory a study was being made to determine how far away the stars were from mother earth.

The most extensive, interesting and readily accessible field for alpine climbers today is found in the Canadian Rockies, particularly the portions included in the national parks of Canada.

When I started out in the world I had but a dollar.  
"What did you do with that?"  
"Wired home for some more."

"Can you lend me ten kroner, old man?"  
"On principle, I never lend money on the first of the month!"  
"But today is the second!"  
"The second? Yes, and I never have any left on the second!"—Kasper, Stockholm.

W. N. U. 1738

### Beef Cattle Market

Good Prices Are Secured For Prime

J. T. McCallum, of Melita, Manitoba, last month sold 24 head of prime beef grade Shorthorn and Hereford steers at prices ranging from \$10.50 to \$12. per hundred pounds to a Winnipeg buyer. The same buyer purchased 15 Aberdeen Angus steers from George Tait, a well known breeder, of Warren, Manitoba, for \$11.50 per hundred weight. These steers dressed 62.5 per cent. They were purchased last October for \$7.50 per hundredweight. At that time they weighed 1,015 pounds, which had increased on farm grown feed to 1,308 pounds at time of slaughter. The grand champion car lot at the Calgary and Edmonton spring shows was sold at \$15. per hundredweight. They were Herefords and were raised by W. P. Fleming, of Calgary.

### Farmers' Profitable Venture

Farmers Of Manitoba Own Creamery Valued At \$90,000

Since the Manitoba Co-operative Dairies, Ltd., Winnipeg, began operations in 1921, it has returned to its farmer patrons in interest and bonuses, in cash or credit, nearly \$75,000, according to a recent report by the management. During the same time the members of the association have subscribed and paid for capital stock in the organization to the amount of \$77,202. Thus the farmers of Manitoba now own the creamery and its equipment, valued at \$90,000, and have received refunds practically covering their investment. At the same time they have received better prices for their butterfat, and the quantity of butter produced has increased from about 300,000 pounds in 1921 to 1,637,000 pounds in 1927.

A Toronto controller wants to know if there is any difference between stealing a dollar and stealing a million dollars. There is the trifling difference that one crime usually involves a term in jail.

A conspicuous sign displayed on a Kind Old Gent: How old are you, my little man?  
Small Boy (tensely): Eight.  
"And what are you going to be?"  
"Nine."

**Smart Sports Attire**  
Smart, becoming and practical. A wide band gives the desired snugness through the hips and a slight blousing to bodice. The French V-front adds length to figure. Design 834 combines printed and plain georgette crepe. Printed silk crepe, two surface of crepe satin, wool crepe, angora jersey and canton faille crepe, are smart suggestions. Pattern comes in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44-inches bust measure. The 36-inch size requires 2 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting. Price 25 cents the pattern.

## English Visitor Sees Excellent Prospects For the Growth Of Sheep Industry In Canada

### Mosquito Control

Circular Gives Instructions Regarding Permanent and Temporary Control

The females of the majority of species of mosquitoes drink blood, and warm-blooded animals and man are the source of this particular form of mosquito food. This makes the mosquito an interesting subject for study, and a circular, just published by the Department of Agriculture, entitled "Mosquito Control in Canada," is timely.

With some of these predacious insects—only live for a few days others live for several weeks, and the best way to control them is to make an attack on their breeding grounds. The Entomological branch advocates in this circular the draining and filling in of low places where water accumulates, and the screening of receptacles holding water such as water-barrels. Temporary bodies of water formed by melting snow, rain and floods are common breeding places for mosquitoes.

"Mosquito Control in Canada," which may be obtained on application to the Publications Branch, Department of Agriculture, Ottawa, deals at length with the life history, permanent, and temporary control measures, procedure in control campaigns, and protection from mosquito bites. Those who desire to identify the particular species common to their district may send specimens for identification to the Dominion Entomologist, Ottawa.

### Plate Glass Plant For Fort William

It is announced by Frank Spence, M.L.A. for Fort William, that the Peldepar Glass Company, of Celina, intends locating a factory at the head of the lakes for the making of plate glass. The company is negotiating to take over the plant and equipment of the Canada Steel Co., located on the Kaministiquia River, with both rail and shipment facilities at hand. The new industry is expected to give employment to about a hundred workers.

Roman roads built before the birth of Christ are now lighted by electricity.

The wise worm doesn't crawl out until after the early bird has eaten his breakfast.

A bright future for the Canadian sheep industry is painted by R. H. Hollings, editor of The Wool Grower, of Bradford, the wool-marketing centre of England. Mr. Hollings visited this country in 1927.

"As I travelled through Ontario, Manitoba, Alberta and Saskatchewan, I could not help asking: 'Where are the sheep?'" writes Mr. Hollings. "Apart from passing a small flock or two on the train I had little opportunity of seeing them."

"It was too early to see any of the new clip, much as I desired to do so. The wool I saw was especially suitable for hosiery manufacture. This will always be a big industry in Canada, the climate making warm underclothes essential. The mills are evidently doing their best with the raw material available, and I was pleased to see that farmers are keeping a suitable type of sheep. I should say that the bulk of the wools range from 50's to 56's quality. I was asked if I thought manufacturing needs are such that the flocks in Canada could be increased to 25,000,000, and unhesitatingly replied in the affirmative."

"I have never known a time in the history of the wool trade when the outlook for sheep men was so encouraging. I am not among those who anticipate lower prices. Merino values are also good, and I think the outlook is of the best. While every other class of farm produce has fallen in value in England during the past two or three years, those who have kept sheep have found better prices and wool to sell well. I would appeal to every Canadian farmer to keep as many sheep as possible, because I think it will pay him to do so. Since returning home I have given three lectures on my trip to Canada, and in these as well as on every other possible occasion, I have endeavored to emphasize the opportunities in Canada for any one with sufficient pluck and enterprise."

"One of the most satisfactory things about my trip was that I met so many Yorkshiremen who had gone out to Canada and made a success of the enterprises upon which they had entered. Sometimes discouraging comments are made upon industry in the Old Country, particularly its agriculture. I hope Canadian readers will not accept all such comments literally, for there are many prosperous farmers in England."

"If Canada is to fill its place in the Empire it needs men of the same type to extend its pastoral and agricultural interests. Quite a large number of Englishmen with a good knowledge of the sheep of their native country have settled in Canada, and these should be able to give some good advice, particularly after they have lived long enough in Canada to become acquainted with its climatic peculiarities."

**Building Elevators Rapidly**  
A new grain elevator every two days has been the record established by the Manitoba Wheat Pool since building operations began this spring. Close to eighty new elevator points have been organized this year, and new elevators will be erected at nearly all of them. In building these Manitoba Pool Elevators over three hundred men divided into fourteen crews are employed.

Judge—"So you and your wife had a fight? How would you like to go to jail?"

Under-sized Husband—"Oh, very much, sir."

Doctor: "Where do you feel it?"  
Patient: "At work"—Lustig Kolner Zeitung, Cologne.

## CANADIAN ORATORY CONTEST

For the second year in succession, the Canadian Oratory Championship, held at Toronto Arena, attracted a phenomenally vast audience, numbering nearly ten thousand. These photographs show, at the left, Wm. Fox, Jun., of De La Salle School, London, Ont., declared champion of Canada by the judges, who numbered five, one nominated by each of the participating provinces. Upper right, Miss Bernadette Mathison, of Duke of Connaught High School, New Westminster, B.C., who was declared second, and lower right, Miss Alice Mase, of the Roblin Consolidated School, Dauphin, Manitoba, who came third. The other contestants were Miss Margaret Kinney, of Victoria High School, Edmonton, and Edith Smith, of Fownal, P.E.I. Fox gets a free trip to Europe after which he will represent Canada in the international contest at Washington.

## WORLD HAPPENINGS BRIEFLY TOLD

Partial prohibition has been decreed in Tabasco, Mexico, by the State Government. An order was issued making it unlawful to sell any alcoholic drink except beer and cider.

There will be no Canadian cadets sent to the Junior British rifle meet this year, it has been announced. Word has been received that a team would have to pay its own expenses.

Three delegates from Soviet Russia will attend the International Wheat Pool conference to be held in Regina on June 5 to 7 inclusive, according to word received by C. P. Burnell, chairman of the International Conference Committee.

Gerald T. Evans, of Vancouver, B.C., won the international gold medal in biochemistry, it was announced at McGill University, when the second year results in the Faculty of Medicine were posted.

A matter of fact statement in the official Turkish newspaper Milliet says that the young government has passed a law forbidding the importation and use of calculating machines in Turkey under severe penalties.

The application of the Winnipeg Board of Trade for a revision of the regulations applying to attendants travelling with race horses has been rejected by the Board of Railway Commissioners. The application was to permit more than two attendants to travel free in cars with race horses.

When Holloway's Corn Remover is applied to a corn it kills the roots and the callous comes out without injury to the flesh.

**Build Eighteen Elevators**  
Eighteen elevators are being constructed by the Alberta Wheat Pool. Each will have a capacity of 30,000 to 40,000 bushels.

## The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Ambrose Orser, Edinburg, Ont., writes:—"I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least little excitement would cause it to flutter and palpitate, and at times I would feel as if I had a pin in my back in this way for some time when, one day, I saw

advertised, so decided to try them. I had only taken a few boxes when I felt better, so I continued taking them until my heart felt entirely different."

Price 50¢, a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

## Farmers' Marketing Tour

Canadian National Railway Tour  
To Great Britain and Denmark, 1928

Continued.

The Co-operative, Wholesale Society embraces almost every conceivable form of modern industry and commerce. It manufactures everything that the modern household needs. It owns a fleet of ships, a printing establishment, breweries, warehouses, fishing stations, tea plantations in Ceylon and farms in the British Isles. It operates a bank, which has an annual turnover of several million dollars. Its Sun Flour Mill is the largest in Europe and works day and night. Here great quantities of Canadian wheat are regularly used. This was our next point of inspection. We were all equipped with long white coats and spent two hours seeing this tremendous mill.

Following our visit to the C.W.S., we were the guests of the Chamber of Commerce at a meeting arranged by representatives of the Fruit and Provisions Trades, who addressed us on the requirements of the Manchester market. We were thus again enabled to gather much useful information.

We now hurried back to our hotel and to get ready for one of the outstanding functions it was our privilege to enjoy during our trip—the reception by the Lord Mayor and Lady Mayoress of Manchester. Over 1,200 citizens of Manchester assembled in the Guildhall to meet us and the spectacle as all these people stood in the main body of the brilliantly lighted hall, while we were welcomed by the Lord Mayor, is one that will never be forgotten by those who attended.

On the morning of the 20th we were taken through Trafford Park, one of the greatest and most modern industrial sights of England. Here there were vast storage and handling facilities for products from every corner of the globe that find their way to Manchester. Some Canadian products were on view, but competing products from Ireland, Denmark and other countries were much more in evidence. We saw the great safes where cotton is stored and after which the latest cotton storage mules of New Orleans have been modelled.

We were here privileged also to see one of the greatest industrial plants of the world—the Metropolitan Vickers Electrical Works—the magnitude of which could not be comprehended by one who has not seen it. Here is made everything electrical from the equipment of super-power plants to the smallest domestic appliances. In the main shops each of the great aisles is over 100 feet long, the over-all width of each shop being 140 feet, and 80 feet from the floor to the ridge of the roof. Each of the two main aisles is spanned by three or four fifty-ton electric cranes, which can pick anything up from any part of the floor.

We saw the great steel bridge over the Manchester Canal, by which ocean-going steamers reach the very doors of the city, 30 miles inland. Accompanied by the Chairman of the Board and many other officials we were enabled to view the great shipping lock after lock toward the sea. During this trip we saw a swing bridge over the Canal open to let our steamers pass and when it closed we saw, to our astonishment, that the swing bridge itself was part of a small canal on a higher level and a few seconds afterwards a number of barges passed over it.

The Manchester Ship Canal might be said to be one of the wonders of the world. Though a private company, it is owned by 40,000 shareholders, many of them laboring men. The rise of Manchester to its present position as a port, is almost entirely due to the completion of the Ship Canal. The long hard parliamentary fight for its construction developed in Manchester a co-operative spirit and civic pride which would be hard to duplicate in even a modern Western Canadian town.

After viewing the Ship Canal we were the guests of the company to a magnificent lunch in the Midland

Hotel, to which were gathered the leading business men of Manchester. Following this we paid a short visit to the Royal Exchange, the largest exchange in the world, with a ground-floor space of 46 and one-third square acres. Unlike trading exchanges in our country, seats are not owned, but members have an annual fee basis. The Royal Exchange of Manchester represents chiefly the cotton industry, and houses almost all the "high change" is on Fridays, when as many as 7,000 men may sometimes be seen gathered together buying and selling on the floor of this Exchange.

Our journey from Manchester to Wolverhampton provided a mild adventure, for by the time the coaches had reached Knutsford, a little town made famous by Mrs. Gaskell, in her story "Cranford," a fog blanket had fallen. We "hove to," wondering if we would be able to continue the remaining 60 miles, or if this fog would mean a night in the coaches by the side of the road, with every chance of being rammed from behind by other motorists. After an hour's wait, however, the fog lifted somewhat, and it was decided to push on as long as our drivers could see a yard ahead of them. The headlights were turned on the side of the road and with one standing on the running board we made progress at about five miles an hour. During this long and tedious journey we sang songs and told stories whiling away the time after all this waiting.

We reached Wolverhampton at 11:30 here, notwithstanding the late hour, the Mayor (Councillor A. E. Wood), waiting for us and a steaming supper which was certainly Mayor cut out all formalities for us to join him after supper in the hotel where we were entertained. Here also we met Mr. E. W. Brown, of the London Office of the Canadian National Railway, who, besides his business qualifications, has a first class reputation as a Canadian singer, and kindly gave us of his best. We left Wolverhampton immediately after breakfast for the ham and bacon factory of Messrs. March & Baxter, in the vicinity of Birmingham. This plant is one of the finest of its kind in the world. Messrs. March & Baxter are the largest of bacon curing firms in Great Britain. The company believe that to maintain quality in their products, the very finest raw material must be used and to this end conduct campaigns against the farmers who supply them.

(To Be Continued.)

## Praise For Canada

Mrs. Stanley Baldwin Cannot Imagine Anything Nearer to Paradise.

"If England ever gets tired of us, the prime minister and I will probably go to live in Canada, that is if we are not too old, for we were so delighted with the Dominion on our recent visit."

This was the declaration of Mrs. Baldwin, wife of Great Britain's premier, Stanley Baldwin, when addressing the City at a distribution of prizes at the City of London school.

Mrs. Baldwin urged the girls to go to Canada for, she said, "there is no better place for young married people; and providing girls choose the right kind of men, I cannot imagine anything nearer paradise."

Wise mothers who know the virtues of Mother Graves' Worm Exterminator always have it at hand, because it proves its value.

New Assistant: What is in that red bottle?

Old Hand: That's the medicine we give customers when their prescriptions are illegible.

Minard's Liniment for insect bites.

An English paper suggests that it is not so hard to escape from a flapper, "but a widow knows all the details."

## SUNDAY SCHOOL LESSON

JUNE 10

### THE ARREST AND TRIAL

Golden Text: "He was despised and rejected of men;—Isaiah 53:3.  
Lesson: Mark 14:43 to 15:15.  
Devotional Reading: Isaiah 53:1-6.

### Explanations and Comments

Pilate Questioned Jesus, verses 1-5.—It was about six o'clock in the morning when the chief priests and the elders and scribes, the whole council, or Sanhedrin, after holding a meeting, declaring Jesus worthy of death and binding Him, hurried Him to the Praetorium where Pilate held his court. Pilate was obliged to come out to them, for the priests would not pollute themselves by entering a Gentile court just before the Passover (John 18, 28, 29). They demanded that Pilate confirm their sentence of death pronounced upon Jesus. Pilate demanded to know what charge they brought against Him. Three accusations they put forward; Pilate was concerned about one of them only, "Art Thou the King of the Jews?" Pilate questioned. The Sanhedrin made this accusation against Him because they needed a political charge, one hostile to Roman supremacy, in order to influence what charge the emperor would put in Pilate's voice as he looked at the wearied prisoner and thought Him a pathetic picture of royalty. Pilate had the right to know the truth, and Jesus answered "Yes," as the literal translation of the Greek for "Thou sayest" means. (The Expositor's Greek Testament thinks one is hardly prepared for such a reply to an equivocal question, and says there is a temptation to seek escape by taking the words interrogatively.—Don't Thou say so?—or—easily—You say so, I make no statement.)

When the chief priests accused Jesus of many other things, he was silent. "Answerest Thou nothing?" said Pilate. The Greek word means that they accuse Thee of. Still Jesus stood in regal silence, and Pilate marveled, Jesus knew that no words would influence that mob in their frame of mind. "I read very little in the life of Jesus respecting His rights," F. W. Robertson writes, "but I hear a vast deal respecting His wrongs—wrong born with a majestic, God-like silence."

"I have had to learn to keep absolutely quiet under every accusation," Lincoln.

## Recipes For This Week

(By Betty Barclay)

### LIGHT LUNCH CROQUETTES

Two cups left-over meat or fish may be mixed with 1 cup thick cream sauce for croquettes. Mold in desired shape, roll in dried bread crumbs, then in beaten egg, again in bread crumbs and fry in hot fat. Thick cream sauce calls for 1 cup milk, 1-5 cup flour, 3 tablespoons butter, 1½ teaspoon salt and a touch of pepper.

### RHUBARB PUNCH

1 quart rhubarb.  
1 quart water.  
1-3 cup orange juice.  
4 tablespoons lemon juice.  
1½ cups sugar syrup.  
Few grains salt.

Put mineral water in a pitcher. Cut rhubarb in small pieces, cook with water until fruit is soft. Strain through double thickness of cheese-cloth, add orange juice, lemon juice, sugar syrup and salt. When ready to serve pour over a cake of ice in a punch bowl, add mineral water and allow to get very cold. Makes 5 glasses; 24 punch glasses.

There are times when the almighty dollar will not go as far as a little politeness.

## SHIP CHRISTIE'S BISCUITS BY AIR FREIGHT

When Major Fitzmaurice, the Irish member of the "Bremen" crew arrived at Seven Islands from Greenley Island, he and "Duke" Schiller, pilot of the relief plane, were met by L. A. Genest, Lower Quebec representative of Christie, Brown & Co., Limited, and Mr. Stewart of the Clarke Trading Company, who tendered them refreshments in the shape of hot coffee and Christie's Biscuits which were, naturally, much appreciated. The above picture shows the aeroplane which carried the first shipment of Christie's Biscuits by Canadian air freight from Toronto to Windsor.

## ECZEMA IN RASH ON HANDS

Troubled For Three Years.  
Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and then formed blisters. It troubled me much more in winter so I could hardly put my hands in water or be near heat. My hands were terribly inflamed and disfigured. I had to wear old gloves to keep from scratching."

"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it so I bought more and after I had used them for three months I was healed." (Signed) Miss Beatrice Alkin, Highwater, Que.

Use Cuticura Soap, Ointment and Talcum for all skin diseases. Sample Box Free. Write for Cuticura Soap, Ointment and Talcum. Send for Cuticura Soap, Ointment and Talcum. Send for Cuticura Soap, Ointment and Talcum. Send for Cuticura Soap, Ointment and Talcum.

## A Strange Luncheon Party

Twenty Guests Entertained Inside Great Organ At Royal Albert

A luncheon party of twenty men inside an organ would seem impossible, yet this happened lately in the well-box of the great organ at the Royal Albert Hall, London, beneath its 13,000 pipes and amid a storm of music.

The guests had come to be shown some of the intricacies of this wonderful instrument, which is soon to have added to it a solo organ with several thousand new pipes. It will then be the largest concert organ in the world.

At this strange luncheon party one of the hosts was Dr. Englefield Hull, the organist, who is shortly giving a series of recitals to test every resource of the huge organ.

The Oil For The Athletic.—In rubbing down the athlete will find Dr. Thomas' Electric Oil an excellent remedy. It restores the muscles and sinews pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

With nearly 2,000 convicts serving terms in Canadian prisons, less than 150 are Negroid, Indian or Mongolian.

## How Much Water Should Baby Get? A Famous Authority's Rule

By Ruth Brittain

Baby specialists agree nowadays, that during the first six months, babies must have three ounces of fluid per pound of body weight daily. An eight pound baby, for instance, needs twenty-four ounces of fluid. Later on the rule is two ounces of fluid per pound of body weight. The amount of fluid absorbed by a breast fed baby is best determined by weighing him before and after feeding for the whole day; and it is easily calculated from the bottle fed one. Then make up any deficiency with water.

Giving baby sufficient water often relieves his feverish, crying, upset and restless spells. If it doesn't, give him small doses of Fletcher's Castor. For these and other ills of babies and children such as colic, cholera, diarrhea, gas on stomach and bowels, constipation, sour stomach, loss of sleep, underweight, etc., leading physicians say there's nothing so effective. It is purely vegetable—the recipe is in the wrapper—and millions of mothers have depended on it in over thirty years of ever increasing use. It regulates baby's bowels, makes him sleep and eat right, enables him to get full nourishment from his food, so he increases in weight as he should. With each package you get a book on Motherhood worth its weight in gold.

Just a word of caution. Look for the signature of Chas. H. Fletcher on the package so you'll be sure to get the genuine. The forty-cent bottles contain thirty-five doses.

## POOR SALARIES PAID SCIENTIFIC AGRICULTURISTS

Ottawa.—A motion to go into supply in the House of Commons prompted C. G. Coote U.F.A., Macleod, to protest that salaries paid to men in the scientific and technical positions of the department of agriculture were inadequate.

Mr. Coote declared that the department of agriculture was losing the professional men because of the low salaries which were paid. He gave a comparison between salaries paid in the United States service and in the Canadian to illustrate the fact that Canada paid much less than the U.S.

The professional service of Canada said Mr. Coote, must compete with that of the U.S. for men. As things now stood many Canadians went to the U.S. to take post-graduate university courses. Frequently they remained there because of the fact they could obtain more money in that country.

Mr. Coote compared salaries paid in the cereal division of agriculture with those paid in the geological survey. The figures he quoted showed that the salaries in the cereal division were lower. Canada could not afford to lose her scientific agricultural men, he declared. Agriculture was Canada's basic industry and wheat growing was the most important phase of that industry.

J. S. Steedman, Liberal-Progressive, Souris, declared the question of the salaries paid to scientific agricultural men was one of the most important matters which had come before the house this session. It should be realized that the prosperity of Canada depended largely on her agriculture, yet the ravages of disease were spreading in certain quarters of agricultural Canada, and it was of prime importance to the Dominion as a whole that adequate salaries be paid our scientific agricultural officials so that their research efforts could be used for the benefit of agriculture in this country.

### Inspection Satisfactory

#### Objection To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto.—"We have examined every single objection that has been raised against the examination overseas by Canadian doctors of assisted passage immigrants and we have not found one that will hold water," declared Dr. David Clark, assistant Deputy Minister of the Department of Natural Health, in an interview here.

Articles appearing in certain sections of the British press against the policy of having Canadian doctors conduct examination of immigrants were full of inaccuracies, he said. "The causes of a decrease in immigration to Canada this year," continued Mr. Clark, "lie deeper than the medical inspection policy. One of the causes for the decrease of immigration from Britain, he felt, was the feeling of increasing optimism there.

### A Martyr To Science

#### Noted Doctor Is Latest Victim Of Scientific Research

London.—News was received here of the death of Dr. William Alexander Young, director of the Gold Coast Colony, Africa. Dr. Young was a co-worker with Dr. Hildeyo Noguchi, who died recently at Accra, of yellow fever, resulting from his researches into the origin of that disease.

It is believed here that Dr. Young contracted the disease in the course of his researches with Noguchi.

Young was of Scotch descent and had a long experience with tropical diseases. In 1924 at the comparatively early age of 35 he was appointed to his present position.

#### Tornado Near Kansas City

Kansas City, Mo.—A tornado struck Englewood, a suburb between here and Independence, Mo. Two street cars were reported wrecked. Ambulances were sent to the scene.

W. N. U. 1736

## Record During March For Canadian Roads

#### Railways Carry More Freight Than In Any Previous March

Ottawa.—The Canadian railways carried more freight during March, 1928, than in any previous March. Gross revenues also were the largest earned in March, exceeding those of March, last year, by \$2,125,479, or 53 per cent. Although operating expenses were heavier than in 1927 by \$1,252,220, or 3.9 per cent, net revenues were larger by \$883,259. The large carry-over of grain has been an important factor in the heavy traffic and earnings of the railways during the first quarter of 1928, the movement of grain to the Pacific ports being particularly heavy. The March payroll was heavier than in 1927 by \$1,037,133, and the average number of employees increased by 8,022.

The Canadian National Railways increase in gross revenue, compared with March, 1927, was \$756,717, or 4.5 per cent, for an increase in freight of four per cent, and a decrease in passenger traffic of 0.3 per cent.

The Canadian Pacific Railway gross returns for March were heavier than 1927 by \$1,251,348, or 8.8 per cent. Passenger and express revenues showed decreases but all other accounts were larger, freight by 12.5 per cent.

### Operate On Cost Basis

#### Alberta Wheat Pool Elevators Adopt New Policy

Calgary.—Wheat Pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by a full attendance of Pool delegates in convention here.

The new policy laid down will represent something new in co-operative effort in Canada, if not in the world. It means that the members will be charged only the bare cost of operating the elevator facilities.

When they haul their grain into Pool houses no service or elevator charges will be made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final Wheat Pool payment.

This change in elevator policy was recommended to the delegates by the directors. The proposal was to eliminate handling and service charges upon delivery of the grain to the Pool elevator and deduct the actual operating cost on a per-bushel basis from the final Wheat Pool payment.

### Has a New Mission

#### Premier King Requested To Arrange For Necessary Rainfall To Ensure Good Crops

Ottawa.—Premier King has a new mission. The latest request is that he shall appoint himself rain-maker extraordinary to Saskatchewan.

"We have had a wonderful seeding time and everything is now in the ground in good shape," runs a letter from Saskatchewan, which Senator Laird read in the Senate recently. "I wish you would draw the attention of the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to deliver the greatest crop Western Canada has ever produced."

#### Vote Sun For League

Ottawa.—The House passed a vote of \$105,968 for Canada's contribution to the League of Nations. Hon. Hugh Guthrie brought up the question of German currency held by the Canadians, which had been repudiated by the German Government. The Prime Minister pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

#### Inquiry Is Ordered

Ottawa.—The parliamentary immigration inquiry has approved a motion for a return showing all special immigration permits issued from January 1, 1920. The report will show the number of permits, officially termed letters of admission or assurance granted to members of parliament and others.

Germany has a shortage of skilled labor.

### May Receive Appointment

The possibility that a Canadian judge will take the place on the permanent court of international justice of The Hague left vacant by the resignation of John Bassett Moore, of the United States, is now openly acknowledged in well-informed circles at Washington. Already, it appears, the name of Mr. Justice Riddell, of Toronto (above), as well-known almost in the United States as in Canada, is mentioned as a likely successor to the American jurist.

### Bill Defeated In Senate

#### Government Measure To Amend Naturalization Act Thrown Out In Upper House

Ottawa.—The Government bill to amend the naturalization act was killed in the Senate.

The bill would have placed authority for the granting of naturalization certificates in the hands of the secretary of state without its being necessary for the applicant to make prior application to courts, as now required.

The bill met stormy opposition in the Commons.

It was discussed at some length by the Senate recently in committee of the whole. Eventually Senator Laird moved that the committee rise. This was carried by 38 to 20. The effect was to kill the bill.

Senator Dandurand, Government leader, explained the measure, which he said would simplify procedure and prevent abuses. The state department had a well-trained staff to handle the work. Experience had shown that court inquiries on naturalization were absolutely useless.

#### Inmates Of Canadian Prisons

Ottawa.—Canadian penitentiaries have at present a total of 2,550 inmates. Of this number, 2,539 are men, and 41 are women. Canadian born number 1,614, and in all 48 nations are represented. This information was given in the Senate in reply to a question by Senator J. P. B. Cusack.

### Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. Bi-weekly in each direction between Toronto, Ottawa, Montreal and Rimouski, where the steamers are met, the new service cuts two days off the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

### U.S. Honors War Dead

#### Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington.—The White Crossed rolling hills of Arlington heeded thousands of citizens, soldiers and sailors of the national capital for the annual memorial service, May 30, at the graves of the fallen heroes of all wars.

For the first time since he entered the White House, President Coolidge led the nation in memorial day exercises outside of Washington. His annual tribute was paid in an address near the spot where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington.

Sir Esme Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the exercises in Arlington cemetery, where they decorated the graves and the Cross of Sacrifice erected by the Canadian Government in memory of Americans who died while serving as members of the Canadian corps.

### Ontario Joins Manitoba

#### In Legal Fight With Federal Government Over Regulation Of Securities

Toronto.—Announcement has been made by Hon. W. H. Price, Attorney General for Ontario, that the province is joining with the province of Manitoba in the latter's legal fight with the Dominion Government over the question of certain rights in connection with the regulation of securities.

Edwin Bayly, K.C., Deputy Attorney-General, will leave for England June 15, and will appear with Hon. W. H. Craig, K.C., counsel for Manitoba, when the case is heard by the Privy Council early in July.

### Receive Degrees At McGill

#### Honorary Degree Conferred On Five Distinguished Candidates

Montreal.—The honorary degree of Doctor of Laws was conferred on five distinguished candidates at the 1928 convocation of McGill University.

The recipients were: Sir Wilfrid Grenfell, famous Labrador missionary; Rev. Canon Cody, Toronto; William Reid Blair, director of the New York Zoological Park and a graduate of McGill; George Isles, writer, and Julian C. Smith, financier.

Sir Arthur Currie, principal, had not sufficiently recovered from his recent illness to be present.

#### Appoint Conciliation Board

Ottawa.—A conciliation board has been appointed to investigate the carpenters' strike in Calgary. Mr. Justice Clarke will be chairman. James H. Gordon will represent the employers, Robert Hewitt, the men. The men are asking for an increase of 12½ cents an hour.

## COOLIDGE MAKES STRONG PLEA FOR WORLD PEACE

Gettysburg, Pa.—In the first speech to be delivered by a president on the Gettysburg battle field since Lincoln's immortal address, President Coolidge, in connection with the Memorial Day exercises, voiced a plea for the abolishment of war as the fittest tribute to the war dead of America.

At the same time he demanded less indifference to crime in the U.S. and condemned what was described as a tendency of the legislatures "to exceed the powers granted to them by the constitution. These things, he said, tended to weaken the regime of law and breed turbulent populations, prone to war.

Declaring the "one thing we want above all else for ourselves and for other nations is a continuance of peace," Mr. Coolidge reviewed negotiations by the state department for treaties against way and for arbitration treaties.

The Briand proposal that the United States and France sign a treaty to renounce war was described by the President as having developed into "one of the most impressive peace movements that the world has ever seen."

"It is my earnest hope that success may crown the negotiations now in progress and that the ideals which have inspired the French minister of foreign affairs and the secretary of state of the U.S. in their joint efforts to find a solution of the problem of peace, may find a solution of the problem of peace."

### Would Provide Work For Ex-Service Men

#### Resolution Favors This As Best Memorial To War Dead

London.—The ex-service men at the British Legion conference passed a resolution to the effect that the best tribute that could be paid to Earl Haig would be providing work instead of relief for ex-service men. Lady Haig was present and said this would have met with the approval of her husband, whose desire would have been, not a statue of himself, but that the men who had fought in the war should be helped.

It is understood that the resolution and Lady Haig's remarks were not intended to deprecate the idea of a national memorial to the late Field Marshal, which the Government is now considering.

British ex-service men will attend the conference of ex-service men, including former enemies, to be held at Luxembourg next September.

### Replace Provincial Police

#### R.C.M.P. Have Taken Over Work Of Saskatchewan Force

Saskatoon, Sask.—The Saskatchewan Provincial police force passes into the pages of history of the northwest, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan sub-division being under the direction of Inspector John Kelly, who transfers from the disbanded force to the "scarlet riders." Some other members of the R.C.M.P. will join the R.C.M.P., while the following members of the latter force, located at the Saskatoon detachment for some time, will carry on: Sergt. A. Drysdale, Detective Sergt. C. E. Hildyard, and Constables T. Theriault and F. W. English. The first two have a long service record in the force, dating back to the old Northwest Mounted days.

#### Against Fast Time

Vancouver.—Vancouver residents will continue for the remainder of this year to work and play on standard time. By a vote of more than four to one the citizens today voted against adoption of daylight saving time for the summer months.

#### Complain About Expenses

Ottawa.—Complaints of Canada House were heard in the House when a vote of \$70,000 for contingencies and \$30,000 for salaries for the high commissioner's office in London were under discussion. After considerable debate, the item carried.

## Pioneer Re-Union at Winnipeg

1. In the costume of her homeland as she will appear at the festival.  
2. An example of Norse handicraft.

As far back as 1869, Paul Helm Hansen, the famous Norwegian journalist, author and social reformer, began to call attention to the fertile valley of the Red River. The river men of his nationality who traversed the territory between Fort Avercrombie and Fort Garry brought back wonderful tales of the splendid settlement opportunities along its banks, with the result that a large influx of Norse settlers commenced in the early seventies. Later, many of these hardy Norwegians moved farther west, some as far as Bella Coola and the sea. Sober and industrious, they have, with each year, progressed and prospered, making a great contribution to the development of the west.

This year a general re-union is

planned for the pioneers from the Red River Valley, with those of the west, to commemorate the beginning of Norwegian immigration into these territories. This event has been arranged to take place in Winnipeg between July 5 and 19. This celebration will feature Norwegian national music, with many pagantas descriptive of home life with participants adorned in their native costumes. Of particular interest will be the exhibition of Norse Handicraft and art. The headquarters for this festival will be the Royal Alexandra Hotel, one of the chain of the Canadian Pacific Railway, which will co-operate by running of special trains from such centers as Edmonton, Moose Jaw, Chicago, Minneapolis, St. Paul and Dubuque.

## CHAPTER XXIV.—Continued.

"I cannot see anything very clearly," said Jack, miserably. "I only know my wife has gone. Circumstantial evidence seems to be against her, but nevertheless I will do my utmost to find her. I will take her word against the world."

The magistrate laughed softly, but there was no mirth in the sound. "Have a drink, my dear young friend," he said, "and forget her."

"No, thank you," said Jack. "I do not drink, and I am pretty sure I will never forget her."

There was something in the young man's voice and in his face that made Col. Blackwood wonder if he had pursued the right course. Perhaps he should tell of her coming to him to find out about the marriage. Perhaps he should tell . . . No! the hell!

—he should be more impatient to him, and she had threatened him. When Jack had gone the magistrate sat a long time, wondering. Then he went to the cupboard and poured himself a drink; another drink, Ah! that was better. Now he knew he was right; another drink, and he was sure that he had done not only a duty but a noble thing in leaving the marriage unrecorded. After the third drink, he sat in a molten haze, musing pleasantly on the time that young Jack Doran would come to him with tears standing in his eyes and thank him for what he had done. "You saved me, and though I should live a thousand years I shall never be able to thank you adequately, Sir." And he would reply: "Have done, my boy—have done; one brave man may ever help another!"

So the night wore pleasantly on.

## CHAPTER XXV.

Not so pleasantly did the night pass with Jack Doran, who sat in the station waiting for No. 8 and listening to the wires telling their never-ending story—a dull, gray station, dusty even when the snow had covered all the dust. A red stove in the middle of the floor, egg-shaped, fluted, and either fireless or red hot according to the mood of the agent; torn posters showing palatial yachts ploughing green seas and carrying pleasure-seeking Canadians to tropical lands, all for trifling sums "and return;" a bill of sale, where in-

structions had been given to the auctioneer to spare nothing, ill-health the cause of the owner's desire to sell; a stray notice re a bull pup answering to the name of "Buster," with a reward; a dance and raffle at Bannerman by St. Faith's Ladies' Aid program and refreshments, and cordial invitation to all; "Save the Forest" poster—"The forest is ours, let us keep it always!" John Fernwald's announcement of his ability to mend shoes. Old Country methods and moderate prices—try me once.

Jack came back to his own bitter thoughts, to which the telegraph wires made a weird accompaniment, ghostly and grim. He could see the instrument from where he sat, muttering, tapping, clicking with its mysterious finger, silent for a few moments, then convulsed and shaken with the desire to be understood. He thought of all the suppressed emotions, the heart-break, anxiety and tears the wires carried in dead silence along the miles, and how they break into strange tapplings here, chokingly alive and articulate.

Life was like that, he mused, we all carry our load of emotions carefully hidden, but we cannot all throw it off at intervals in dots and dashes like the wires.

Reaching the City, Jack went to the Macdonald Hotel, where he met his partner, Keith, whom he had not seen since the night of the recruiting meeting at Peace River. They discussed their plans for the future.

"I am going to have our specimens assayed here at the University, and I will go at once to Victoria to file our claims," said Keith.

Jack told him briefly of his domestic troubles. "I believe she is here in the city," he said in conclusion, "and I want to find her. I will not believe a word unless I hear it from her."

Keith whistled softly. "This is bad work, boy," he said, "and I am sure any carry our load of emotions carefully hidden, but we cannot all throw it off at intervals in dots and dashes like the wires."

Jack was looking out at the wide view of the winter landscape, with the magnificent river, covered with snow, winding away into the blue distance. "I don't want a flock," he said, "but I do want Helmi. If you knew her, Keith, you would know she couldn't be crooked. She has eyes that are like a little girl's, full of wonder and innocence."

"I don't believe there are any innocent girls these days," Keith replied, lighting his pipe for the twentieth time. He could never keep his pipe going, and when he sat for half an hour in one place he had burnt matches strewn around him like confetti around a bride. Keith was a set-man of very dark complexion, tanned now to a rich mahogany. "My own opinion is that you are well out of it, Jack," he continued; "but I'll admit I'm no judge of women. They can all fool me."

"Sometimes I think of enlisting," said Jack. "When I listened to that boy leaning on his crutch I wanted to go. The other old scoundrel rather spoiled it, though."

"Gosh! I liked him," said Keith, grinning. "He told us some of the richest stories I ever heard."

"I couldn't stand him and his stories," Jack said with warmth. "He's the sort that make war, he loves it, you can see that—but you'll notice he will never do any of the fighting. It looks as if the thing had to be finished up now that we are in it."

Keith was watching Jack closely, even though he was so busy keeping his pipe going. "I'll certainly look after your interests, Jack, if you want to go. I'll file for you on everything I get while you're gone, and I'm going to get right after the potassium deposits and the oil as soon as I get the clock chucked."

"I knew you would," said Jack gratefully. "I am not thinking about that."

"And I'll do my best to locate the Helmi girl and see that she has plenty."

Jack remembered Helmi's outbreak of rage when Keith's name was mentioned, and hastened to say, "I hope I'll find her before I go."

So, gradually, the thought of enlisting took shape in Jack's mind. It was with him when he stepped into the white bath-tub and enjoyed the luxury it afforded, with its shining appointments, moony towels, foaming soap. But he could not forget what Private Crowe had told about the

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inimitable flavor of Red Rose Orange Pekoe make it last longer, go farther, and taste better. Packed in damp-proof aluminum.

dent, the mud, the lice, the scratery underwear. He was glad to think of the wealth coming to him from the gold mine, for he craved the luxuries of life, and he wanted to be able to give them to other people. He loved white sheets, smooth and satiny, and beautiful rugs with deep rich colorings, music, pictures; but especially did he want these things for Helmi, who had such a love for beauty.

No matter where Jack's thoughts began they would soon come back to Helmi. He wondered if she had got the two hundred dollars all right. At first he had thought that he would send it for it when they were outfitting at Peace River, but Keith sold another share, and then they were all right. He had even written out an order for a friend of Keith's who of course to advance the money and get it when he went to Eagle Mines. What had he done with that order? Yes, he remembered—Keith got it back from his friend and destroyed it.

The first day Jack was in the city he made a thorough search of all the Chinese places, but without result. When he came to Sam's he was met by the wily proprietor, who had learned in a hard school that it is foolish to give information. Sam could not deny all his knowledge of English in a fraction of a second. "I not know," all at once became his entire English vocabulary.

(To Be Continued.)

## NEGLECTED ANAEMIA

Often Leads To The Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way to check the disease is to use Dr. Williams' Pink Pills. These pills are so effective in enriching the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McCachern, Port Hood, N.S., says: "I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

"If you are at all run-down, or weak, or feel the doctor's statement that you are suffering from anaemia, take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

## Plains Buffalo In North

The experiment of transferring buffalo from the national park at Watnigwilt, Alberta, to Wood Buffalo Park near Fort Smith, Northwest Territories, has proved entirely successful and the 5,500 plains buffalo which have already been transported have definitely shown their adaptability to northern conditions.

British scientist says that the brain is the only part of the body which doesn't wear out. The test of this theory is, of course, first to find the brain.

## Walk in Peace

## MINARD'S

"KING OF PAIN"

MINARD'S

MINARD'S

## Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

## DENTAL HEALTH PILLARS

"Sugar and spice and everything nice" may be what little girls are made of, but certainly such a diet would never build strong, healthy little girls and boys.

With the child properly started on the road to health, through the mother's careful dietary habits, there must be no slacking in this regard, if it is to continue safely along the way.

Proper diet from the nursing period up through adolescence has much to do with teeth and health. It is now that nutrition plays the chief role in the formation of healthy tooth tissues or in their early degeneration and decay. But heavy, or hard with this must go the maintenance of cleanliness through training the child in the best and most thorough mouth hygiene.

The notion that the deciduous teeth being replaced by successors can therefore be allowed to go without the care necessary to keep them sound and comfortable is most illogical. Too early loss of these little teeth from any cause leads to disturbances of the permanent dentition with consequent general disorders.

It would be better for the young child not to know the taste of sweets too soon, thereby avoiding their craving at this early age when they may be harmful both to the tooth and the body health. Plain wholesome foods should be the rule including plenty of milk, because it is both rich in nutrient quality and easily assimilated, is the perfect food for the young child.

Parents should be reminded too, that the child should be brought to the dentist at about three years of age and thereafter at stated intervals. Preferably the first visit should be made before there are any cavities in order to establish the confidence of the young child in these services. Much of the dread of dental treatment, with its consequent neglect of mouth conditions among adults has arisen through recollection of painful first visit during the tender years.

It may be further noted that the susceptibility to tooth decay is greatest in youth, most cavities appearing before the twenty-fifth year; and that the period of adolescence and between the twelfth and sixteenth years, marks the high-water mark of susceptibility due to the rapid physical changes demanding an increased calcium supply present in the diet. Diet must be hygienic and systematic dental examinations are the pillars of dental health.

## Ocean Ships For The Great Lakes

Tramp Steamers From Europe Finding Their Way Into The Great Lakes

One indication that if the St. Lawrence canals were deepened, sea-going freighters would be common to the ports on the great lakes is that this is already done by tramp steamers which are able to go through the shallow St. Lawrence canals. A German freighter from Hamburg is now lying at the docks in Detroit, on a cargo of motor-cars which will unload at Barcelona, Spain. For years past an occasional small tramp steamer has pushed its way into the great lakes in search of a grain cargo. If these things happen with 14-foot draught vessels, it is no prediction that a 27-foot channel would bring whole fleets of tramps to the lake ports. The tramp steamer will go where there is traffic if it is possible to get there—Manitoba Free Press.

Attacked By Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems almost miraculous. Its help is quickly apparent and the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Over Fifty Minerals Being Produced A notable feature of the program of the Dominion as a mining country is the diversity of lines along which Canadian mining has advanced. Some fifty different minerals, metallic and non-metallic, are listed in the production figures for 1926, and this number includes a variety such as nickel, cobalt, asbestos, gold, lead, silver, copper, and zinc, in which Canada either leads or ranks among the greater producing nations.

Most of the bats of Canada eat only insects, but there are a few fruit-eating bats in the extreme south of the United States and many in Mexico and Central America.

## Little Helps For This Week

"The will of the Lord be done."

Acts xxii. Light! more light to see What is the true and perfect will of God.

That we may help to do it; not as tools, That know not what they fashion, but as hands,

Whose heart is in their work; and whatsoever It be—this, above all, more faith to cry.

In darkness or in light, "Thy will be done."

Love is higher than duty, and the reason is that love is really something due in itself. Love is duty and something more. Love is a beautiful plant with a beautiful flower, of which duty is the stalk. All acceptable obedience flows from love; all true love produces cheerful service. We do not really love God if we do not seek to obey Him.—Rose Porter

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

## Cardinal Newman On Style

To Produce Good Literature Put Your Thoughts Into the Simplest and Clearest Words Possible

"I have no style," wrote Cardinal Newman. "All my life I have tried to think out clearly what I know, what I see, what I feel, and to put it into the simplest and clearest words. That is all my style. To produce literature you must first of all know what you are writing about; write in as simple words as you can; cut out the purple patches; be sincere without being dull; grip the subject by you; feel it, and translate it into the simple English our fathers have handed down to us."

For Rheumatism use Minard's Liniment.

## No Chrome Being Produced

There has been no production of chrome in the Dominion in recent years although Canada is known to possess reserves of chrome ore, and a considerable tonnage was mined and shipped during the war period.

A Swedish count is coming to Canada to learn farming by working as an agricultural laborer, and the question is, what farmer is going to take the count?

## ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Brynmar, Alberta.—"The Change of Life was the trouble with me, and I was run-down, thin, and weak and could not sleep, had a poor appetite and would not do much work. I am taking Lydia E. Pinkham's Vegetable Compound now and I feel like a new woman. I saw it advertised in the papers and tried it and Lydia E. Pinkham's Sanative Wash. I have recommended it to a lot of women friends. Mrs. Wm. Goodkey, Brynmar, Alberta.

### Stony Plain and District.

Mr P G Thomson, the Edmonton lawyer, was not able to be present at the session of the local Court on Tuesday. A hearing on the four cases on the docket was postponed.

Mr Sam Comisarow has accepted a position with the Millet Trading Co.

Mr J. A. Fyfe, school inspector, gave the local public school a lookover on Monday.

The next attraction at Muir Lake Schoolhouse will be a box social. Watch The Sun for the date.

M M Meeklenburg, the well known optical specialist, will be at the Royal Hotel, Stony Plain, on Friday, June 1st. See him and see well.

### Sporting Notes.

The ball team of St. Mathew School engage in a game on Friday last with the boys from Rosenthal school. Score: St. Mat's 18, Rosies 12. St. Mat's battery, Jackie Miller & Otto Mille. Umpire, Chas. Wudel.

The local Public school's junior ball players motored up to Glory Hills school on Monday, but the G H. team did not put in an appearance. Their captain promised to bring his team to Stony tomorrow evening.

### Washylko-Kruppa

An old-fashioned wedding celebration, Ukrainian style, was held Saturday evening last at the home of Mr and Mrs F Washylko, of Carvel district.

The affair was to celebrate the nuptials of Miss Anne Washylko and Mr Peter Kruppa, both of Carvel District. The marriage ceremony had taken place earlier in the day, at the Ukrainian church, Edmonton, and was performed by Rev Father Laditto, the pastor.

The bride was daintily attired in a dress of white tulle, with bridal veil, and carried a bouquet of roses and carnations.

The feast in the evening left nothing to be desired—what with samples of everything in the eating line a la Russ and a few triumphs of the cooks' skill a la Canadian. No mention is made of what usually accompanies the edibles at an affair of this kind, but it is claimed that the G.L.C.B.'s Concord wine was excellent.

Dance music was supplied by Strikemupski's orchestra, from the City. During the dance intermissions the singing of Russian folk songs by the male chorus was indulged in.

The invited guests from Stony Plain who attended are looking forward with pleasure to the next wedding celebration.

### Ted Has a Job.

Principal Markle is on the sick list and his place in the High school is being taken by Ted Kibblewhite, a former graduate of the High school and an old Vermilion boy—Vermilion Standard.

FOUND—Green Mackinaw coat and a bag containing man's clothing. Apply Police Detachment.

LOST, Auto Plate No. 57085. Kindly leave at Sun Office.

### Spruce Grove News

Big delegations from Stony Plain and Edmonton helped to swell the crowd which patronised the Friday evening dance in the Highway Pavilion. About \$25 was realised, to aid the ball club. The same orchestra intend putting on another dance in the near future.

Winterburn's ball tossers played a return game on local grounds Friday evening last, with the result, that the visitors won quite handily, the Grove not having its regular team on the job.

Mr Walter Brox, who recently started working for the Gillespie Co., is on the sick list this week.

On Sunday next, June 10th, at 10 a.m., the Rev Andrew McCann, C.S.S.R., of Winnipeg, will open a mission at St Joseph's church. Evening devotions will be held at 8 o'clock; and during the week masses will be offered at 6 30 and 8.00. Rev Father McCann has preached many successful missions in all parts of Canada, and is a forceful pulpit orator.

In Spruce Grove district, on Tuesday, May 29, to the wife of Mr Philip Schram, a son.

There will be a conference of the delegates of the Lutheran church (Manitoba Synod) on July 4th to 10th, in St Matthew's church (Manitoba Synod). Pastor Poetzsch is expecting some 60 delegates to be in attendance.

Good progress is being made on the building of the new Gillespie elevator at Acheson.

Hail fell on Sunday afternoon in the sector between Winterburn and the Grove; and another hail storm occurred at the Grove Monday afternoon.

Found, on the Baseline, near Spruce Grove, motor license number 65583. At Sun Office.

### Carvel News

About Midnight, Thursday last, Fred Washylko, a farmer of Carvel district, was awakened from his slumbers by the continued barking of his watchdogs. On arising and going to the door to ascertain the cause, he noticed a man on a gray cayuse moving thru his pasture field, heading toward his barns. Fred hailed him. The intruder did not reply, but instead moved behind a building. Fred then secured his shotgun and fired a warning shot in the air, upon which the unwelcome visitor turned tail and made off. Apparently the rider's horse had become badly frightened, as a three-strand wire fence was found broken down where the horse and rider had broken thru, leaving some souvenirs upon the broken wires.

The ball game Friday evening, at Carvel, between the players from the local school and those from Willingdon S.D., resulted in a win for Willingdon boys, under their teacher, Mr White. Carvel boys made a good showing, but were unable to hold their own against the "bigger and better" players. Miss Shandro was referee.

Meredith Bros. are buying hogs and cattle at Carvel every week.

### Duffield Doings

Councillor Geo Akin had an interview on Monday last with the Deputy Minister of Municipal Affairs in connection with the roads in Div. 3. He was accompanied by Messrs John Akin and Carl Ohlsen.

Duffield Co-op's next shipping day is Tuesday next, 12th of June.

Mr Mike Turlock, formerly section boss here but now of Wolf Creek, is building a residence on First St., Stony Plain. Mike will move his family there when the building is completed.

### Holborn Happenings.

A meeting of Holborn local of the U.F.A. has been called for Saturday evening, June 9th. The chief topic of discussion will be matters in connection with the Wheat Pool. There will be election for a delegate to the convention to be held shortly.

U. F. A. dance at Holborn Hall the evening of Friday, June 22.

The farmers here are busy sowing their barley at present.

### Not Much of a Holiday.

Can't blame the bank boys for taking all the holidays as they can get, because as they'll admit themselves, they earn them; but a rather good one in this connection was heard the other day. It was on Tuesday, which has come to be recognised as 'Straw Hat Day,' and a town man was joshing a farmer as to why he wasn't observing the day. The farmer didn't catch on to what his friend meant, but he came back with: "Well, it can't be much of a holiday, the bank ain't closed."—Ledue Representative.
